

# P3TEC / advanced wall protection

Bevel, Beveled Grass P3T-60240

Ultimate protection  
against **COVID-19**  
disinfectants

**P3TEC Advanced Wall Protection** is not only durable, impact and abrasion resistant it is also extremely chemical resistant. P3TEC stands up to repeated exposure to the harshest environmental cleaning and disinfecting chemicals that are commonly used in healthcare environments.

Health Canada and the various Provincial health agencies across Canada generally advise that the following list of disinfecting agents and their working concentrations are known to be effective against Coronaviruses including COVID-19 (SARS-CoV-2).

Agent and Concentration	Uses
1:100 dilution Chlorine Bleach – sodium hypochlorite (5.25%)	Disinfecting surfaces and medical equipment.
1:50 dilution Chlorine Bleach – sodium hypochlorite (5.25%)	Disinfecting surfaces contaminated with bodily fluids and waste
Accelerated Hydrogen Peroxide 0.5%	Cleaning and disinfecting surfaces and medical equipment
Quaternary Ammonium Compounds (QUATs)	Disinfecting surfaces.

**P3TEC protects against and is not affected by the strongest of undiluted commercial cleaning and disinfecting agents including, but not limited to, the following:**

- 1:1 undiluted Chlorine Bleach
- Virox® and Virex®
- Clorox®
- Hydrogen Peroxide
- Isopropyl Alcohol
- Lysol®
- CaviWipes®
- QUATs
